Writing the future ... markets for responsible paper!

Invitation to the 4th FSC Global Paper Forum, 9 – 10 June 2008 on drupa08 in Düsseldorf, Germany

The 4th FSC Global Paper Forum is the next conference of a series of informational meetings of the FSC paper market. It is an international forum where FSC paper related businesses will meet together with NGOs to create a stronger market and new opportunities for FSC labelled paper. The Forum in 2007 was attended by both buyers and producers of paper from around the world. You will also have the chance to visit the world's leading trade fair on printing and paper, drupa. The organiser is the FSC Working Group Germany together with the Rainforest Alliance.

Several key notes and panel discussions as well as a three break out slots with four parallel workshops offer you a wide range of information on the FSC world. Also two seminars are offered as training sessions on technical FSC rules. The Forum offers you the chance to get latest updates on developments of the FSC market and FSC International Policies. For our partners and the FSC-Network all over the world the meeting will assure a global perspective. The following main features will be offered:

- success: good brand meets good paper
 - Opportunities to match demand and supply
 - Impact of FSC on forestry, conservation, trade and laws
 - New FSC Standards in Chain-of-Custody
- ... and more.

The conference starts at 13.00 on June 9 and ends at 13.30 on June 10. If you want to participate in the training sessions note in your agenda 10 pm June 9. The most recent agenda is available at www.writingthefuture.org.

Book your participation now!

Background:

The FSC is an international not-for-profit membership-based organization that brings people together to find solutions to the problems created by bad forestry practices and to reward good forest management. The FSC Working Group Germany is one of the national initiatives of FSC.

The Rainforest Alliance works to conserve biodiversity and ensure sustainable livelihoods by transforming land-use practices, business practices and consumer behaviour.
